Description of the design:
Description du dessin:

An endpiece for an exercise device having a base with a rear portion and a front portion. The base includes an outline which has a front linear edge merging with side edges at right angles thereto and the side edges merge with a convexly curved rear edge. The rear portion has an upwardly and inwardly sloped rear wall extending from the convex rear edge of the base terminating in a flat top surface parallel with the base. The rear portion terminates at a vertical front wall which steps down to the front portion and which includes a sloped planar surface of rectangular outline. The top surface of the rear portion includes a recessed portion extending from the front wall and having a line of demarcation parallel to the rear edge. The side walls are vertical and flat.
